

Research/Peer Review Professionals in Behavior Analysis, Psychology, and Education,

We are conducting a research study to examine the similarities and differences in peer review feedback for manuscript submissions in academic journals. We are asking for voluntary participation in a survey that may provide information surrounding this topic.

The study will take place virtually and will take up to 2 hours to complete participation. You will complete two mock peer reviews on manuscripts generated with the assistance of AI.

If you would like to participate, please access the link here (LINK) to read more information, complete a pre-screen to determine eligibility, complete informed consent if eligible, and complete mock peer reviews.

Thank you for your time and consideration in participating in this research. Should you have any questions, please contact either Robin Arnall, Ph.D, BCBA-D, LBA, rarnall@thechicagoschool.edu or Al Elfers, M.S., BCBA, LBA, COBA, aelfers1@ego.thechicagoschool.edu
