Research Participants Wanted

Factors Predicting Anxiety in Muslims Living in the U.S.

My name is Hadiyah Rasheed. I am conducting a research study to fulfill the requirements for a Psy.D. in Clinical Psychology at The Chicago School.

The purpose of the study is to determine if the combination of Muslim identity, religiosity, immigration status, and perceived islamophobia can predict level of anxiety in Muslim living in the U.S., and if there are unique predictors of level of anxiety among the four risk factors.

Participation

You will complete a one-time online survey that asks questions about your demographics, background, beliefs, experiences with discrimination, and level of anxiety. It will take approximately 10 minutes

https://qualtricsxmlvrgbbjrp.qualtrics.com/jfe/form/SV_3OcGGdiz3PkYXmC

Eligibility

- Be 18 years old or older
- Live in the U.S.
- Fluent in English
- Identify as Muslim

Access the survey by clicking on the link or scanning the QR code!

Thank you for your consideration. You are welcome to forward this to individuals who may qualify for particpation in this study.
